## HOW TO DO MORE THAN JUST SPOIL YOUR LOVED ONES THIS HOLIDAY SEASON

### THINK SUSTAINABILITY

Protecting the Earth and resources is critical, and holding corporations accountable is one way to show you care.

Many of the brands we carry value sustainability, through using recycled materials, fair trade, or increased transparency.

### SHOP LOCALLY

Supporting local companies has a multitude of benefits! Small businesses are the largest employer nationally..your money gets re-circulated into the community..you get better customer service..and you matter more.

Not to mention, when small businesses succeed, they give back to local nonprofit organizations at a higher rate!

### CONSIDER CORPORATE PHILANTHROPY

The best companies choose to give back to a cause that aligns with their mission and values.

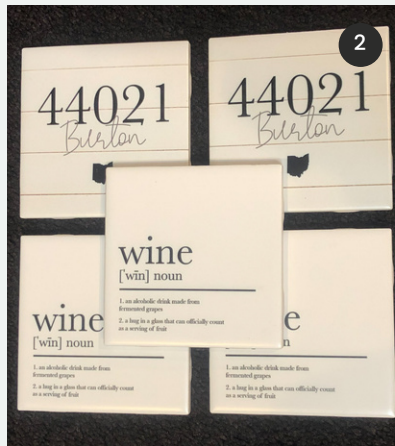

At Lulu Tru, we support organizations that provide care and research to lung disease. Finding a cause near to your heart is a great way to narrow down your brand choices!

### CHOOSE CLEAN, NON-TOXIC PRODUCTS

Using products that contain natural and organic ingredients are better for your skin, your body, and the environment. Our commitment to clean, healthy products as a way to heal our body and mind is at the core of our mission. That's the Lulu Tru Way!
